Hi Peter,

I have some unfortunate news to share: You are currently the only student working in this week's activities in your time zone. This means that you will be required to work solo for the rest of the week (if you decide to continue).

In this scenario, you would have to work without a Morning Session team or a Collaborative Group of learning/coding partners. The main problem is that there is a high likelihood that you will have to work alone for the foreseeable future, as we cannot guarantee that more students will be joining you in the next few weeks.

Currently, you are one week behind everyone in your module. In case no one else fails a week, this means you will be left working solo until the end of this module, and perhaps even longer.

So what does this mean for you? Well, I'm able to offer you the two following options:

1. You can remain in the program knowing that you might be working alone in the next few weeks if we still can't pair you, or
2. You can choose to take a break now and restart when other students reach the same part of the curriculum as you. This could be a month away. You would not have to restart the module from the beginning but would continue working in the block where you left off.

I know that neither of these makes for an optimal experience, and I'm truly sorry that we've presented you with this difficult decision today.

Please take a moment to think about your options and let us know how you would like to proceed.

Warm regards,

Marco Lizza

Hello, So I was not assigned any learning partner or morning partner for the first block of the second module and now no zoom links appear on my daily schedule. Please help.

Hi Marco Lizza,

Thank you so much for your timely reply.

I am more than okay with continuing to work alone for the time being until I can get a partner. I am only worried about my attendance and engagement since I'm not getting any zoom link invites anymore.

Thanks for confirming Peter.

If you are solo in a group, the Join Call button does not appear and you will be automatically marked present.

Hope this helps.

Perfect, Thank you for the reply.
I will continue working alone for the time being.
